Init1SD15-Adhoc reporting features

Pre Interview:

Item	Information/Response
Date:	12/23/2009
Requirement # unique id *<SemCon Ops Initiative>.<analysts initials><requirement number>* e.g. Init1dbw1 (eventually linked to Use Cases)	Init1SD15
Originator/Customer's Name:	Denise Warzel/ Forum post
Originator/Customer's Company:	NCI
Summary of requirement pre-interview, by Reviewer:	caDSR needs to be queryable by an open source tool that is as robust and flexible at digging out complex data scenarios and generating BI and Analytics as Oracle Discoverer. The main actors here would be an Information Technologist or a Metadata Specialist looking for data of his interest.The chief business goal is to make caDSR more intelligent and efficient thus reducing the effort it takes to generate business intelligence from a metadata repository like caDSR
Recommended Next Step Enter one: Follow-up interview, Observe, Use Case Template (text), Use Case Model (formalized/UML diagram), Group Discussion, Prototype, Waiting Room	Follow-up Interview
