How to Use Results - Include v4.4

To do this...	Do this
Sort the list of trials	By default, the system sorts the trials by priority, from **1** (high) to **3** (low). To sort the list by any other column, click any column header. To reverse the order, click the column header again. An arrow indicates the sort order: • Ascending: Down arrow indicates that you can click to sort in descending order. • Descending: Up arrow indicates that you can click to sort in ascending order.
Update the list of trials	Click the **Refresh** button.
Export the list of trials to a file	On the upper or lower right corner of the page, click one of the following: • Click **CSV** to create a generic comma-separated value file. • Click **Excel** to create a Microsoft Excel spreadsheet.
View trial details	Click an **NCI Trial Identifier** link. The *Details* page appears with information about the trial you selected.
