	      ■ "This iterator has expired and is no longer valid."
	   ○ The Mayo dev team will update this message appropriately.

URI Resolver URLs Update	Discussion Points: • There was an issue found in testing on DEV where the CTS2 service is throwing errors while connecting to URI resolver over https. • A fix will need to be put in for this. • We agreed that this fix should be put into the next sprint. Decision Points: • The Mayo team will add this issue to the next sprint ○ ⚠ LEXEVSCTS2-110 - Jira project doesn't exist or you don't have permission to view it.
NCI Nexus Server Migration Update	Discussion Points: • LexEVS Build Configurations and Status • Cory is working with Phil on the Ant script deployment. Decision Points:
NCI Docker Hub	Discussion Points: • When pulling artifacts from the main Docker hub, versions change. This often breaks our overall scripts. • We would like to have a controlled environment. This could be on the NCI Nexus server. Decision Points: • Cory will create a ticket and start a discussion with Sarah Elkins and the SCM team about the ability to have NCI persist docker containers on the NCI Nexus server.
Value Set Architecture Update	Discussion Points: • We had a meeting with Rob on Monday to better understand his VS Resolution workflow. ○ Discussed report writer artifacts. • We will have a meeting with Kim to understand his VS resolution ideas. Decision Points: • Craig to set up a meeting with Kim (include Rob and Tracy).
Data Services • Bob Kline	Discussion Points: • We need to determine if we have to continue to support the legacy caCORE or if we can assist Bob in transitioning to the CTS2 REST service. • We need to follow up with Bob and let him know that the caCORE API calls that he uses are legacy and that they will be going away. ○ We need to come up with a transition plan with him. Decision Points: • Craig to respond back to Bob.

	- We discussed where the metadata should be displayed in the admin GUI.
	
	Decision Points:
