Init5pm21 - Debugging of Terminology Mappings

Pre Interview:

Item	Information/Response
Date:	12/18/2009
Requirement # unique id *<SemCon Ops Initiative>.* *<analysts initials><requirement number>* e.g. Init1dbw1 (eventually linked to Use Cases)	Init5pm21
Originator/Customer's Name:	Jyoti Pathak - forum post
Originator/Customer's Company:	Mayo Clinic
Summary of requirement pre-interview, by Reviewer:	In another requirement, it is expressed that providing terminology mappings is needed. However, once a mapping is in place, there needs to be a way to validate that the mapping is correct. There should be a way for users to detect mappings that will cause semantic and logical inconsistencies. This functionality will be most useful for Information Modelers and Metadata Curators.
