

6 - Installing LexEVS 6.x CTS2 Services

Contents of this Page

- [Prerequisites](#)
- [Build the LexEVS Service Plugin \(Optional\)](#)
- [OSGI type installation](#)
- [Non-OSGI type installation](#)

LexEVS 6.x Installation Links

- [Install Guide Main Page](#)
 - [Overview](#)
 - [Prerequisites and Platforms](#)
 - [Local Runtime](#)
 - [Local Runtime Command Line](#)
 - [Distributed](#)
 - [CTS2 Services](#)
 - [URI Resolver Service](#)
- [LexEVS 6.0 Main Page](#)
- [LexEVS Current Release](#)

Prerequisites are dependent upon the type of installation. This service has two basic kinds of installations, OSG and non-OSG.

Prerequisites

- Installation of [LexEVS Runtime](#) and if desired the [LexEVS Remote API](#) and all dependencies
- Web application container for Non-OSGI installation
- If building the LexEVS Plugin the following are required:
 - Git 2.9.x
 - Maven 3.3.x
 - Java 1.8.x

Build the LexEVS Service Plugin (Optional)

See below for the pre-built plugin, Otherwise run

```
git clone https://github.com/cts2/lexevs-service.git
```

Change the directory to the lexevs-service.

```
cd lexevs-service
```

Change to the appropriate branch:

6.1 branch:

```
git checkout tags/qa_v6.1.rc8.05.2013
```

6.2 branch:

```
git checkout tags/v1.3.0.FINAL
```

6.3 branch:

```
git checkout tags/v1.4.0.FINAL
```

6.4 branch:

```
git checkout tags/1.5.0.FINAL
```

6.4.1 branch

Prior to building 6.4.1 (or later), the MAVEN_OPTS variable will need to be set as described here: [LexEVS Nexus Migration to NCI](#)

```
git checkout tags/1.5.1.2.FINAL
```

6.5 branch:

```
git checkout tags/1.6.0.FINAL
```

Build the plugin.

```
mvn clean install
```

The resulting plugin will be found in the lexevs-service/target directory.

OSGI type installation

This kind of installation provides a quick way to set up a REST service and can be done against an existing installation of the LexEVS Remote API, such as that hosted by the National Cancer Institute.

- Download the [CTS2 Framework Standalone Server](#) 
- Install and start the server: <http://informatics.mayo.edu/cts2/framework/installation/> 
- Download the following java jars to be installed as plugins:
 - [CGLIB](#) 
 - [AspectJ Runtime](#) 
 - [AspectJ Weaver](#) 
 - [LexEVS Service Plugin](#) 
- Install each as detailed in [Installing a Service Plugin](#) 

Exception for the LexEVS Service Plugin

Follow the same steps for the LexEVS Service, except leave the Start Bundle box unchecked.

- After the plugin has been installed, navigate to the `Configuration` tab of the Admin Console.

11	Spring AOP (org.springframework.aop)	3.1.0.RELEASE		Active	  

Non-OSGI type installation

This type of installation is more customizable and allows deployment to your own web container. Instructions are available on the [CTS2 Github page](#)
