Protégé 3.4.2 (build 562) Release

December 17, 2009

Highlights of [this update](#) include:

- Updates to Protégé Client-Server
 - Modifications to the metaproject
 - Modifications to the Server Admin Panel
 - Modifications to the API
- Updates to Core Protégé
- Updates to Protégé-OWL
- Updates to Collaborative Protégé & Change Management
 - Modifications to the Changes & Annotation Ontology (ChAO)
 - Collaborative Protégé now supports the archival of notes and discussion threads
 - The default notes view will show an "archived" check box and a drop-down list for selecting the status of a note
 - The number of notes attached to a class is shown in the class tree next to the notes icon
 - A status filter for notes and changes has been added to the filter combo box
 - Made performance improvements by using a cache of note counts and ontology components
- New Bundled Plug-ins
 - Axiome
 - BioPortal Reference Plugin
 - Lucene Query
- Updates to Existing Bundled Plug-ins

Protégé 3.4.7 Release

July 15, 2011

The highlights of this release are:

- Added additional SQWRL operators to support more elaborate query result selection:
 - selecting a subset of results
 - retrieving all elements from a collection.
- Updated SQWRL Query API.
- Updated the BioPortal Reference plug-in to store the short term ID properly.
