## LexEVS Meeting Minutes - Docker Planning Session - 2017.05.01

## Attendees

Name	Role	Present
Mensah, Jacob	NIH/NCI [C]	x
Hartman, Phil	NIH/NCI [C]	x
Wei, Lu	NIH/NCI [C]	x
Bauer, Scott	Мауо	
Stancl, Craig	Мауо	x
Endle, Cory	Мауо	x

## Agenda

Status Update	Discussion Points:
Mayo team	<ul> <li>Mayo email addresses have been added to the notifications.</li> <li>The configuration is working as expected.</li> <li>The issue where containers weren't being removed was fixed by manually removing the containers. This can be added to the script to prevent from happening in the future.</li> <li>Decision Points:</li> </ul>
Reusable Docker Containers	Discussion Points:
<ul> <li>Discuss plan to determine how create Docker containers and store them on NCI Nexus server for reuse in our lexevs- system-tests.</li> <li>CentOS 7</li> <li>Tomcat 8.x</li> <li>Java 8.x</li> <li>MySQL 5.6.x</li> </ul>	<ul> <li>Currently, pull resources into the container - but doesn't actually use NCI provided version.</li> <li>NCI currently manually updates software as new versions become available.</li> <li>CentOS, Tomcat, Java, MySQL available in Nexus for others to use.</li> <li>NCI is trying to provide solution in the future. <ul> <li>Not available in LexEVS Production environment</li> </ul> </li> <li>Would be possible for NCI to pull Docker Hub and store the container in Nexus.</li> <li>Goal is to not have to worry about Docker Hub releases day to day. Idea is to run on what is NCI supported.</li> <li>Short Term <ul> <li>NCI pulls MySQL, etc. from Docker Hub and store in NCI internal. Allow the system tests to pull from NCI internal.</li> </ul> </li> <li>Long Term Goal <ul> <li>Fully docker-ized for production.</li> </ul> </li> <li>Decision Points: <ul> <li>Cory/Jacob to let Wei know which versions of components to pull from Docker Hub.</li> <li>Wei to look at how to docker-ize the tier deployment.</li> <li>Wei to give access to allow Mayo team to put containers on NCI internal Nexus.</li> <li>Cory to send Wei the architecture to start preparing the docker-ization.</li> </ul> </li> </ul>
