Editing Disease and Condition Indicators - Include 20170511

You can change the *Include in XML* indicator or the *Primary* indicator for current records in a given trial.

How to Edit Disease/Condition Indicators

1. Search for the trial of interest. For instructions, refer to Searching for Trials in PA.
2. In the search results, click the NCI Trial Identifier link for that trial. The Trial Identification page appears.
3. On the **Trial Identification** page, check out the trial. For instructions, refer to Checking In and Checking Out Trials. (This checkout step is optional for Super Abstractors.)
4. On the **Scientific Data** menu, click **Disease/Condition**. The Trial Disease/Condition page appears, with disease or condition records displayed.
5. Click the **Edit** icon. The Edit Disease/Condition page appears.
6. To include or exclude the disease/condition in the XML document for submission to ClinicalTrials.gov, select or clear the **Include in XML** check box respectively.
7. To designate the disease/condition as primary, select the **Primary** check box. A trial can have zero, one, or more diseases/conditions as primary.
8. Click **Save**. The edited record is displayed on the Disease/Condition page.
