

# Deleting Diseases and Conditions - Include 20170511

The system removes records from view when you delete diseases or conditions from a trial, but it does not delete them from the system. However, there is no way for you to recover a deleted record. If you delete a record accidentally, follow the instructions in [Adding Diseases and Conditions](#) to add it back.

## How to Delete Diseases/Conditions from a Trial

1. Search for the trial of interest. For instructions, refer to [Searching for Trials in PA](#).
2. In the search results, click the NCI Trial Identifier link for that trial. The Trial Identification page appears.
3. On the **Trial Identification** page, check out the trial. For instructions, refer to [Checking In and Checking Out Trials](#). (This checkout step is optional for Super Abstractors.)
4. On the **Scientific Data** menu, click **Disease/Condition**. The Trial Disease/Condition page appears.
5. Do one of the following:
  - In the **Delete** column for the appropriate record, select the **Delete** check box, and then click **Delete**.
  - or -
  - To delete all records, click **Select All**, and then click **Delete**.
