Deleting Diseases and Conditions - Include 20170511

The system removes records from view when you delete diseases or conditions from a trial, but it does not delete them from the system. However, there is no way for you to recover a deleted record. If you delete a record accidentally, follow the instructions in Adding Diseases and Conditions to add it back.

How to Delete Diseases/Conditions from a Trial

1. Search for the trial of interest. For instructions, refer to Searching for Trials in PA.
2. In the search results, click the NCI Trial Identifier link for that trial. The Trial Identification page appears.
3. On the **Trial Identification** page, check out the trial. For instructions, refer to Checking In and Checking Out Trials. (This checkout step is optional for Super Abstractors.)
4. On the **Scientific Data** menu, click **Disease/Condition**. The Trial Disease/Condition page appears.
5. Do one of the following:
     - In the **Delete** column for the appropriate record, select the **Delete** check box, and then click **Delete**.
       - or -
     - To delete all records, click **Select All**, and then click **Delete**.
