## **Reordering Interventions - Include v4.4**

You can change the order in which the interventions are displayed in the interventions table and in the TSR/XML documents.

## How to Re-Order Intervention Criteria

- 1. Search for the trial of interest. For instructions, refer to Searching for Trials in PA.
- 2. In the search results, click the NCI Trial Identifier link for that trial. The Trial Identification page appears.
- 3. On the **Trial Identification** page, check out the trial. For instructions, refer to Checking In and Checking Out Trials. (This checkout step is optional for Super Abstractors.)
- 4. On the Scientific Data menu, click Interventions. The Interventions page appears, displaying all other interventions currently abstracted.
