Running the Duplicate PO Person Records Report - Include 20171003

This page tree describes how to run the Duplicate PO Person Records report based on person records available in the Clinical Trials Reporting Program (CTRP), specifically the Person/Organization web application. This report displays information about pairs of CTRP person records that share the same first name and same last name, and also have in common at least one of the following: CTEP ID, email address, phone number, and organization affiliation.
