# Assigning a Program Code to a Single Trial - Include v4.4

1. On the **Manage DT4 Information for Your Center** page, in the row for the trial of interest, in the **Program Code(s)** column, click the **v** icon.

   The Program Code field appears.

2. Click the **Program Code** field. The list includes all program codes for the organization family, but the ones already assigned to the selected trial are unavailable for selection.
3. Select the target program code. The Program Code(s) column reflects your changes.

You can also assign a program code to a trial while performing the following tasks:

- Registering, amending, or updating a Complete trial. For instructions, refer to Registering New Trials, specifically Recording Data Table 4 Information.
- Adding your site after importing a trial. For instructions, refer to Registering Abbreviated (Industrial and Other) Trials.
- Adding a participating site to an Abbreviated trial or updating such a site (as a site affiliate). For instructions, refer to Adding Your Site to Abbreviated Trials.
- Adding participating sites to Abbreviated trials (as a Site Administrator). For instructions, refer to Adding Sites.
