Agenda

EVS Weekly Tech Meeting	Discussion Points:
	
	• LexEVS
	 ◦ Updates for DEV system to be configured to run Docker containers.
	  ▪ Jacob mentioned that they are still working on this.
	 ◦ CTS2 online API documentation on NCI Dev.
	  ▪ Cory requested to install the required redis server
	  ▪ Jacob is looking into if we can install this redis server. Redis is currently not on the technology stack.
	• Browser/Tools
	• Data
	• Systems
	• Triple Store/EVS API
	
	Decision Points:

Roll Call	
Sprint Status	**Current Sprint** - Sprint 74 (January 18, 2018 – January 31, 2018) 16X237 Agile Development - Sprint Status#16X237AgileDevelopment-SprintStatus-Sprint74

CTS2 on-line documentation update	Discussion Points: CTS2 online API documentation on NCI Dev. • npm and node.js were installed. It was determined that the redis server is required for the API documentation service to run. • Cory requested to install the required redis server. • Jacob is looking into if we can install this redis server. Redis is currently not on the technology stack. Decision Points: • If Jacob determines redis cannot be installed, we will move forward migrating to the Swagger API.

Discuss empty value sets	Discussion Points:
	
	• When to - load, represent, and search.
	• Currently these aren't loaded due to the fact their concept have no incoming Concept_In_Subset associations.
	• But the browser is representing them in the hierarchy.
	• Also, we decided long ago not to load empty value sets (as coding schemes) because it wasn't possible to search when multiple value sets including an empty value set were selected.
	
	• Rob suggested to not load empty value sets at all - even source asserted value sets.
	• Scott suggested there are options to manage empty value sets.
	
	Decision Points:
	
	• We will test this on Dev.
	  ○ Manually update a terminology with publish=no and set Concept_In_Subset associations and determine how this displays in the browser.
	  ○ Rob will test with the FDA terminology.

Ongoing Remote API strategy	Discussion Points: • Scott asked the question - should new lexevs API calls be remote enabled? This would take additional time to accomplish. Decision Points: • This should be covered in the future technical EVS meetings.
LexEVS External Users	Discussion Points: • caDSR and configuration of the remote client. Decision Points:
Team Absences	Mayo Team • Cory - • Scott - • Craig - NCI • Tracy - • Rob - 2/13-3/6 • Bron - • Sana - • Kim -
