Agenda

EVS Weekly Tech Meeting	Discussion Points: • LexEVS ○ NCI Docker has been updated to 17.09. This will allow the Mayo team to run their updated scripts with the new CentOS 7/Tomcat 8.5 image. ○ caDSR is not ready to move to 6.5. 6.4 will need to be maintained on production for them. ○ Tracy updated the namespace that CTS2 returns for NCIt. This is on stage and will stay there until the end user verifies it works. • Browser/Tools ○ 2.11 patch testing is complete ○ 2.12 patch link was sent out for feedback • Data • Systems • Triple Store/EVS API Decision Points:

LexEVS 6.5.0 Finalization	Discussion Points:
	
	• Tuesday
	  ○ What are the big ideas (overview of items) we want to get out of the meeting
	  ○ This will drive the discussions over the next 2 days.
	• NCI Systems Discussions
	  ○ Broaden the scope - what would they like to see out of our terminology resources.
	• Time frame - 9:00 to 4:00 each day. If we finish early, we can have wrap up/discussion on Thursday.
	
	Decision Points:

Terminology Mapping	Discussion Points: • Swiss Prot • ICD-O-3 to NCIt (also includes the meta CUI) ○ Mapping from NCIt to a source that is not loaded in LexEVS (point to a remote URI that is not resolvable) • Mapping and the triple store. This could be a consistent API for LexEVS to pull from. Decision Points:
MED-RT	Discussion Points: • NDFRT is being replaced by MED-RT ○ NDFRT was published for the FDA • MED-RT is 1/2 a terminology and 1/2 a mapping • NDFRT content is moved to other terminologies (RxNorm and others) Decision Points: • Margaret will ask FDA if MED-RT should be published. • NCI will notify users of NDFRT and that it will be retired after a specific amount of time.
