# Agenda

#### EVS Weekly Tech Meeting (Systems Discussion Points: focus) · Systems related topics: o LexEVS ■ EVS Services were impacted by DB fix. Services were down momentarily and are back up and running now. ■ DATA DEV Request. • There was a data dev box for 6.4. • We need a local DB (not networked). • The request is to replicate Data QA as a Data Dev O Data QA is a separate blade server. • Jacob suggested a VM for a Data Dev server. • It is easier justification get a VM instead of a new blade server. Jacob will attempt to re-purpose 6.4 dev server. Jacob will install CentOS 7 and configure o Browser/Tools o Data o Systems Triple Store/EVS API **Decision Points:** • Jacob will attempt to re-purpose 6.4 dev server for a data dev server. Jacob will install CentOS 7 and configure for us. Jacob suggested this could be completed in about a week.
