Cant resubmit to validation	My validation submission is just frozen. Id like to submit to the validation leaderboard but I cant.	Closed	01 - December - 2018	03 - December - 2018
submit failed	My submission on test set failed. I also noticed that rid of test set and rid in BreastPathQSampleTest.csv are not match. After I deleted duplicate rows their amount are both 1119 so I tried both of them but all failed. The error log was Traceback most recent call last File worker.py line 290 in run raise ExceptionProgram metadata is not available. Exception Program metadata is not available. Could you please provide new CSV file for testing	I found that the test files and files in the CSV file released in the training phase are mismatched. To be specific there are 1119 files in the test set while 1121 in the csv file. Could you please release a new file BreastPathQSampleTest.csv for the order of testing Thank you very much	Closed	03 - December - 2018	06 - December - 2018
