2019-02-05 Meeting notes

Date

05 Feb 2019

Attendees

- Safran, Tracy (NIH/NCI) [C]
- Ong, Kim
- Endle, Corey
- Bauer, Scott

Goals

Discussion items

Time	Item	Who	Notes
	Demo tomorrow		Anything needed
	LexEVS 6.4		Shutdown July 2019 finally got this a ticket in CTRP/CTS. They might now be requesting aid
	EVSRestAPI /LexEVS RestAPI		Natalia said a JSON client would be helpful. They are accustomed to receiving objects and moving to REST means they will need to convert from JSON to objects. They would like some support to do so. • What kind of objects are they using? Iterators? Individual objects? • Bring it up with Lyubov tomorrow
	LexEVS and Rest API for mapping		Both relational and TS have weaknesses. LexEVS has performance issues when you resolve a node with a hierarchy under it. Some TS have performance issues querying graphs and require a graph on top. Stardog is marketed as a graph database so possibly already supports this. Further investigation needed.

Action items

- [ ] Check with Lyubov, Craig about creating a JSON interpreter
- [ ] Check Stardog's support of graph queries (Tracy)
- [ ] Tracy - continue interacting with CTRP for migration. Keep others posted
- [ ]
