# 2019-06-18 Meeting notes

## Date

18 Jun 2019

## Attendees

- Safran, Tracy (NIH/NCI) [C]

## Goals

## Discussion items

| Time | Item | Who | Notes |
|------|------|-----|-------|
| | | | |
| | Going from 5 to 2 servers | All | How much hard drive space do we need<br><br>Stardog 20G right now<br><br>LexBIG index |
| | | | How do we divide the work?<br><br>Processing and loading are resource intensive<br><br>DataQA could be on a VM |
| | Prod vs Dev chains | | Dev requires loading - how do we keep that separate from production data?<br><br>We need an environment for processing and loading for production chain<br><br>We need a separation between that and the software development. |
| | | | Stage as fallback - replaced by VM? |
| | Docker | | Lot of tasks to rethink the entire architecture |
| | Absolutes | | Need failover for Prod<br><br>Need wall between production data and software development<br><br>Need loading and processing on physical server<br><br>Need close watch on performance of indexes and database over network |
| | Prep for QA next week | | Get new OBIB and NCIt loads using last week's snapshot |

## Action items

- ☑ Load OBIB and NCIt using last loader snapshot.
