

Enter Field Data with the Set Data Macro

The set data macro allows the user to enter text in a single-line or multiple-line text field.

[More information](#) 

The general form is

```
{set-data:[Field Name]|type=[text/number/date/boolean/content/attachment/user|format=[date or number format]
|hidden=[true/false]}Value{set-data}
```

An example follows.

```
{set-data:TestSetDataField|type=text}Test of Set-data{set-data}
```

The set data macro establishes the data. Test of Set-data The get data macro displays the data.

```
{get-data:name=TestSetDataField}{get-data}
```
