

Add and Remove Repeating Sections with the Repeating Data Macro

The repeating data macro allows the addition and removal of repeating sections in Edit view.

This page shows the general form and an example.

[More information](#) 

The general form is

```
{repeating-data:Name}  
Repeating content.  
{repeating-data}
```

An example follows.

```
{repeating-data:Contacts}  
h2. Name: {text-data:Name|required=true}{text-data}  
Email: {text-data:Email}{text-data}  
Phone: {text-data:Phone}{text-data}  
Address: {text-data:Address|type=area|width=300px|height=150px}{text-data}  
{repeating-data}
```

Name

RequiredEmailPhoneAddress
