

# Template that Changes on Pages when the Template is Updated - Live Template

This page shows the general form of the live template macro, and the [Template Test Page](#) shows an example of the macro in use. The Test Template is a space template created and modified for this test. It could also be used as a static template.

For more information, refer to the following page:

<https://docs.servicerocket.com/scaffolding/macro-reference/live-template> 

The general form is

```
{live-template:Page Template Name}
```

To use the live-template macro

- Create a template in the template editing interface.
- Put the live template macro on a page you want to create using the template, and update each time the template is updated.

For this example, the Test Template started with this content:

This is a test template. The last word is five (5), spelled out all in caps. FIVE

The [Template Test Page](#) shows use of the live template macro, Any differences from the preceding line represent changes in the template.

The macro on the [Template Test Page](#) is

```
{live-template:Template Test}
```
