Agenda

EVS Discussion

Systems	Discussion Points:
	• Recap of 07/09/19 meeting
	Putting in a ticket for a new Dev tier VM to test to see if performance is sufficient.
	The tickets will be for VM with the following specs:
	8 processing cores
	32 GB Memory
	200 GB Storage with additional 10 GB tmp directory
	The VM will host LexEVS, CTS2, URI Resolver and Term and Metathesaurus Browser
	The ticket will just be for the VM, we will work on creation of containers and applications after the VM is in place.
	There will be nightly backups of the VM if we ever need to do a restore but it will take a little time.
	Discussion Points:
	Lyuba asked what kind of performance requirements we should have.
	Tracy mentioned that Yahia would be getting the Dev db to QA
