# 2019-06 Monthly Status Report

| Accomplishments this month |
|---|
| 1) Helped NIH team figure out how to turn off debug mode on CodaLab site |
| 2) Helped Cuong understand admin mode and (Create Superuser) functionality of Django site. |

| Planned for next month |
|---|
| 1) Data prep for Miccia Test phase |
| 2) Be on call for AAPM RT-MAC live challenge if there are any issues. |

| Comments |
|---|
|  |

| Meeting | Date |
|---|---|
| Bi-weekly Meeting #1 | 13 Jun 2019 |
| Bi-weekly Meeting #2 | 27 Jun 2019 |

**Milestones**

| Description | Date |
|---|---|
|  |  |

**Task**

| Description | Resolution | Status | Creation Date | Close Date |
|---|---|---|---|---|
| 1) Submissions failed on RT-MAC challenge | Somehow "Results Scoring Only" was unchecked and that was causing the evaluation script to try to run users code but they had none. | Done | 6/07/2019 | 6/10 /2019 |
| 2) Details of submission not available to admins | The competition was in blind phase mode and wouldn't allow anyone to see the detailed logs and reports. The solution was to check "Enable detailed results" in competition details. A newer version of Codalab allows admins to always see this option. | Done | 6/15/2019 | 6/18 /2019 |

**Risks**

| Description | Mitigation | Rank | Status | Creation Date | Realization | Close Date |
|---|---|---|---|---|---|---|
| Task (2) needs careful attention as leaving detailed results enabled allows participants to see logs and adjust their algorithm unfairly. | Admins need to always remember to uncheck when done review detailed results | 1 | Done | 06/18/2019 | -- | -- |
