

Putting a List of Child Pages on a Page

We have multiple macros that add a list of links to child pages:

Macro Name	Children Display	Page Tree	Page Tree
Macro Name in Source Editor	children	pagetree	rw-pagetree
Root Parameters	Parent Page	Root Page, Restrict to this Space Key	Space, Root page (page ID of root page)
Descendent Parameters	Show Descendants, Depth of Descendants	Start Depth	Expand depth
Excerpt Parameters	Excerpt Display	Include Excerpts in the Page Tree	(none)
Sort Parameters	Sort Children By, Reverse Sort	Sort Pages By, Reverse Order	(none)
Expand /Collapse Parameters	(none)	Show Expand/Collapse Links (CONFSERVE R-60434 is a known issue.)	Include expand/collapse buttons
Search Parameters	(none)	Include Search Box above Page Tree	Include search bar above page tree
Other Parameters	Number of Children, Heading Style	(none)	Theme, Space shortcuts, Space content menu
Visible in PDF?	Links are visible in generated PDF.	Expand/Collapse options are visible in generated PDF, but the links are not.	Neither the Expand/Collapse options nor the links are visible in generated PDF.
Examples	For examples on this wiki space, try searching for the Children Display macro .	For examples on this wiki space, try searching for the Page Tree macro .	For examples on this wiki space, try searching for the Refined Page Tree macro .
Atlassian Help	Confluence: Children Display Macro 	Confluence: Page Tree Macro 	Refined: Page Tree 

All of these macros can be configured so that the list of links represents a whole wiki space, or just one page family. For definitions, refer to [Definition of Child Page](#), [Wiki Space](#), [Page Family](#).
