

Linking from Another Website to a Wiki Page

If you intend to create a link that points to a wiki page, and you intend to create that link *outside of the wiki*, use the Tiny Link. The Tiny Link is a permanent link. That is, it continues to work even if someone changes the page title or moves the page to a different wiki space.

1. In the wiki page (in view mode rather than edit mode), choose one of the following methods:
 - Click the Share icon above the page title, on the right side of the page. Click **Copy**.
 - Click the Tools (...) icon above the page title, on the right side of the page. Select **Page Information**. The upper left panel of the page provides the Tiny Link. Copy the Tiny Link.
2. In the page where you intend to create a link, paste the Tiny Link.
