2020-04-22 Meeting notes

Date

22 Apr 2020

Attendees

- Safran, Tracy (NIH/NCI) [C]

Goals

Discussion items

Time	Item	Who	Notes
	Stardog access for exporter		Curl query? No sparql endpoint. • Yang says there is a java connector and will send info • Discussed whether dev instance would be onprem or AWS. Scott said properties would be affected but either should run
	UMLS Batch QA		How to deploy loader? • only use for standalones now on DataQA? ○ Loader does have changes for OWL and MetaBatch loader. Source code has implications for indexes and APIs. ○ Need to test 6.5.3 client versus 6.5.4 loaded vocabs. All vocabs on Dev are loaded under 6.5.4.
	NCIm not working on Dev,		• will build but won't deploy. Does seem to work on remote but not local. • Check to see what lbconfig.props meta is using on Dev.
	LexEVS 6.5.4 status		General status on API and browser with eye to tasks • Swathi needs more vocabs for regression testing. Will compile a list • Scott will need to do a client test on 6.5.3 - or whatever version caDSR is using • I need to find what client caDSR has.
	EVSRestAPI status		Visible to people yet? There is a tag on production and ready to go public.
	Stardog update to 7		• AWS Dev? - waiting on application testing • Any higher tiers? Not ○ on prem - not yet. Will look at it once AWS done. Needs systems coordination
	FTP site issues		Name column shortened. Contacted a week or so back. Jason contacted him again yesterday and he said he would look at it.

Action items

- ☐ Yang - send out Stardog info
- ☑ Tracy - find caDSR LexEVS client version
- ☑ Tracy - check Dev configuration for Meta
- ☐ Scott - set up client test for 6.5.3 vs 6.5.4 loader
- ☐
