Answer

Starting with caArray 2.3, any **registered** caArray users may download array design files from caArray's public instance by following the steps below:

1. Login to caArray.
2. Select the option of "Manage Array Designs" in the caArray Welcome Menu.

Login Screen and Welcome Menu

3. Sort the list of the array design files alphabetically by clicking on the "Array Design Name" column heading.
4. Find the file that you are interested in and click on **Download** icon to download the file.

Presently, the search function in caArray is for experiments only. The only way to find an array design file is to follow the steps listed above.
