2020-07 Monthly Status Report

1) Staging environment is up and working

2) Image template has been modified to include sample data for training (needs to be done as we are cutting internet to the participant's dockers)

3) Carolyn and I met to discuss creating first series of videos.

Planned for next month
1) Run test phase and switch competition over to docker submission.
2) Make edits to PR website videos as needed.
3) Help Carolyn with code submission and potentially docker submissions explanations.
4) Learn about integrating Kubernetes with CodaLab for larger scale challenges. Medici will be referenced as the organizing and developing agency.
5) Integrated Okta into CodaLab for restriction to MGB users.

Comments
Things that went well: • Moving data to GPU VM took a day but it's all there and seems to work. I had to create an Azure disk and mount to the VM for this.   • A full working example of docker submission between VMs is located here: http://miccai-staging-environment.centralus.cloudapp.azure.com/   • Official secure participant docker is read on dockerhub for Organization "cpmcomps" and repo: "cpmcomps/miccai-2020: training_phase_dl_submission"   Things that could be improved: • https with queues   • Okta integration would be nice and I'm working on that right now as well

Meeting	Date
Bi-weekly Meeting #1	09 Jul 2020
Bi-weekly Meeting #2	23 Jul 2020

Milestones

Description	Date
Trained my first model in pyTorch	23 Jul 2020

Task

Description	Resolution	Status	Creation Date	Close Date
Create Docker image	started	pending	13 May 2020	--
Getting NIH badge	started	pending	14 May 2020	--

Risks

Description	Mitigation	Rank	Status	Creation Date	Realization	Close Date
