

NCI CTEP CDISC Harmonized Standard Forms

These standard forms have been created as part of the NCI CTEP CDISC Implementation. This is a collaborative effort between NCI CBIIT and NCI CTEP; the NCI CDISC aligned content has been leveraged as appropriate in consideration of NCI CTEP CDISC implementation.

- The CTEP standard forms include CDSIC aligned question text, prompt, CDISC published CT, CDASH variables and the corresponding caDSR Form PIDs and CDE PIDs.
- The variables within the CTEP standard forms have a two letter domain prefix specified where appropriate as per our NCI CTEP CDISC implementation decision.
- The NCTN/ETCTN curation style guide requirements have been applied to the content in the CTEP standard forms.

The CTEP standard forms are posted on the [CTEP CDISC Standard Forms](#) page under The CTEP CDISC Harmonized Standard Forms page.

The CTEP CDISC Harmonization Roadmap below represents the estimated release schedule for the CTEP CDISC Harmonized Standard Forms. Note this roadmap is driven by the LPOs needs and can be adjusted as needed per LPO request.
