Attendees

Name	Role
Remennik, Lyubov	NIH/NCI
Lucas, Jason R	IS
Bauer, Scott	Mayo
Stancl, Craig	Mayo
Endle, Cory	Mayo
Kuntipuram, Kumar	NIH/NCI [C]

Agenda

Report Exporter Planning

Survey	 Survey workflow and refine requirements Mock-up Back End processing DB / email Lyuba suggested to go the simplest way. Don't over complicate. We should explore the email option Report Security Reviews for data? Craig asked if there are other tools doing this? Jason mentioned that Terms form sends email to distribution list. We suggested the "Survey" link could be "Feedback".
Roles	 Roles workflow Mock-up Lyuba asked what happens if user selects multiple concepts? Possibly have a checkbox for selecting roles or something explicit to choose all roles Then we wouldn't need role selection page Lyuba mentioned that we don't need properties - They are in our original report. Lyuba suggested that the editor look at this and review this. Refine requirements
Associations	 Review Requirements Lyuba said this would be the same as the Roles (above).
Editors Meeting	Lyuba suggested that we review the Roles and Associations workflow with the editors.
