# 2021-04-26 DGAB Meeting notes

## Date

26 Apr 2021

## Discussion items

| Item | Who | Notes |
|------|-----|-------|
| Acceptance Criteria | All | <ul><li>Sutdy Size<br>Genomic data collection plan<br>Other quality criteria?<br><br>How does ICDC define "rigor"<br>- A solid protocol with good data collection in a big cohort<br>- Molecular data, genomic in particular<br>- Useful for third-party computational analysis that results in new, non-obvious conclusions<br>Reproducibility?<br>Be able to run models on the data<br>Data should be "extensible", can be built upon<br><br>Might be better answered by the Best Practces group. Have them define "rigor" and the kinds of data that needs to be<br>part of the study.<br><br>A separate group to consider clinical specimen data?<br><br>A large clinical study without molecular would be of interest. As would a 10 dog study with single cell seq<br><br>Invite Will and Matthew Breen to next Best Practices meeting, Warren claiming he's not a good rep<br><br>Actually full joint meeting<br><br>ICDC is now registered at Identifiers.org, just awaiting final confirmation</li></ul> |
