

Editing Biomarkers - Include v4.5

You can change recorded marker information or delete marker records from a trial.

How to Edit Marker Records

- 1. Search for the trial of interest. For instructions, refer to [Searching for Trials in PA](#).
- 2. In the search results, click the NCI Trial Identifier link for that trial. The Trial Identification page appears.
- 3. On the **Trial Identification** page, check out the trial. For instructions, refer to [Checking In and Checking Out Trials](#). (This checkout step is optional for Super Abstractors.)
- 4. On the **Scientific Data** menu, click **Markers**. The Markers page appears.

Markers

One item found.1

Name	Evaluation Type	Assay Type	Biomarker Use	Biomarker Purpose	Specimen Type	Branch	Semantic Type	Reference Gene (Cluster)	NCIt C-Code	Record Status	Edit	Delete
RPS6 Gene (Ribosomal Protein S6 Gene; RPS6)	Somatic Variant	Proliferation Assay	Integral	Response Assessment	Buffy Coat	Gene	Gene or Genome		C91350	Active		

Add

Delete

Select All

- 5. To edit a marker, in the **Edit** column, click the **Edit** (pencil) icon. The **Edit Marker** page appears.

Name: *

RPS6 Gene

NCIt

Evaluation Type: *

☐ Level/Quantity

☐ Genetic Analysis

☐ Cell Functionality

☐ Subtyping

☐ Protein Activity

☐ Proteolytic Cleavage

☐ Phosphorylation

☐ Methylation

☐ Acetylation

☒ Somatic Variant

☐ Activation Status

☐ Loss of Heterozygosity (LOH)

☐ Germline Variant

☐ Chromosomal Deletion

☐ Chromosomal Amplification

☐ Other

Note: Users have the option to multi-select attribute values for Evaluation Type

Assay Type: *

☐ PCR

☐ In Situ Hybridization

☐ Microarray

☐ ELISA

☐ Immunohistochemistry (IHC)

- 6. Follow the instructions for selecting and saving attributes in [Adding Biomarkers](#) to change the recorded information.
