

calnt 0011 - Deploying a study that links to an experiment in caArray with only CEL data

Question: Is it possible to deploy a study that links to an experiment in caArray with only CEL data?

Topic: calIntegrator Usage

Release: calIntegrator 1.2 and above

Date entered: 05/26/2011

Answer

calIntegrator needs level 2 data such as the CHP data. Therefore, in order for a study to link to an experiment in caArray, that experiment needs to contain CHP data. CEL data are optional for calIntegrator.
