Fixed Bugs

The following table lists and describes the bug(s) resolved in this caNanoLab release.

Description of the resolution	JIRA issue link
On the Characterization page, the Delete button is now left-justified.	CANAN OLAB-264
An Error message no longer appears while deleting a Functionalized Entity.	CANAN OLAB-464
<p>The Elsevier link for caNanoLab now works properly. When a user performs an Elsevier search, caNanoLab returns a caNanoLab logo if the publication has linked samples in the caNanoLab database. If not, caNanoLab sends a transparent one pixel image.</p> <p>The following is the URL format that searches caNanoLab for a DOI ID.</p> <p><code>https://cananolab-qa.nci.nih.gov/caNanoLab/views/publicationSampleImage.html?type=DOI&id=ADDID</code></p> <p>For example:</p> <p><code>https://cananolab-qa.nci.nih.gov/caNanoLab/views/publicationSampleImage.html?type=DOI&id=11.1111/z.zz.9999.99.999</code></p>	CANAN OLAB-498
On the SamplesGeneral Info tab, the Delete and Copy buttons are now left justified and the Reset and Update buttons are right-justified.	CANAN OLAB-512
When Adding or Editing on the SamplesCompositionFunctionalizing Entity page, the box no longer has a broken right border.	CANAN OLAB-514
When Editing a nanomaterial entity for a Composing Element on the SampleCompositionNanomaterial Entity page, the box no longer has a broken right border.	CANAN OLAB-515
When you Search for Samples, select a <i>long</i> Sample name (such as, <i>HarvardU_Harvard_MIT_BWH_HarvardSCA-JApterkarAN2009-11</i>), and click the link in the Data Availability column, the data table borders no longer appear beyond the popup box.	CANAN OLAB-517

Improvements

The following table lists and describes the new feature(s) in this caNanoLab release.

Description of the improvement(s)	JIRA issue link
<p>In the Sample->CharacterizationData and Conditions segment, if you add a Column Type, Datum, you can add up to three cell viability Column Names: cell viability, cell viability B, and cell viability C.</p> <p>With this arrangement, you can, for example, have columns for cell viability standard deviation, cell viability mean, and cell viability median.</p>	CANAN OLAB-242

In the Sample->CharacterizationData and Conditions segment, when you add values to each row of the matrix, you can preface each value with one of the following: Maintain the default, equal to (=), or select greater than (>), less than (<), or infinity (approximate).	CANAN OLAB-495
Button sizing, color, and spacing are now consistent across all pages in the application.	CANAN OLAB-506

Known Issues and Workarounds

The following table lists and describes how to work around the following remaining issues in caNanoLab.

Known Issue	Workaround	JIRA issue link
You cannot add multiple points of contact to one organization.	Add a division or department name to the organization's name and then add the contact to that organization.	CANAN OLAB-61
The Results tab is populated when a curator/administrator submits a batch job to create a data availability matrix, but the tab disappears if the curator/administrator logs out and logs in again, even if the job is still running.	None	CANAN OLAB-81
When submitting a new publication, clicking Reset does not reset the Submit Publication Form.	None	CANAN OLAB-197
You cannot sort Protocol search results by the Protocol Type and Protocol Name columns.	None	CANAN OLAB-367
You have to click the DOI external URL twice (or open the link in a new window by right-clicking) to view the external PubMed content.	None	CANAN OLAB-368
A Publication Search returns more records than is valid based on the search criteria.	None	CANAN OLAB-391
