caDSR Sprint 1.21 Release Notes  
November 15, 2021

## Improvements

The following are tracker numbers and descriptions of improvements.

| Description                                                                                                                                                               | Jira Tracker Number         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| ALS: Add Question isMandatory flag to Form ALS query                                                                                                                      | <a href="#">DSRMWS-1334</a> |
| ALS: Change handling of duplicate ValidValues for DataDictionaryEntries                                                                                                   | <a href="#">DSRMWS-1340</a> |
| ALS: Deleted CDE from a form still on the ALS Download                                                                                                                    | <a href="#">DSRMWS-1352</a> |
| ALS: Download Collection Wiki and UAT Documentation                                                                                                                       | <a href="#">DSRMWS-1230</a> |
| ALS: Fixes to Fields tab IsRequired and IsVisible                                                                                                                         | <a href="#">DSRMWS-1333</a> |
| Change Management: Add ability to see Character Count to Short and Long Name in AI, DE and VD Maing                                                                       | <a href="#">DSRMWS-1240</a> |
| Change Management: Allow curator to create VM Standalone and Edit VM Duplicates                                                                                           | <a href="#">DSRMWS-1200</a> |
| Change Management: Allow curator to edit PV/VM Associations to create Duplicates                                                                                          | <a href="#">DSRMWS-1308</a> |
| Change Management: Create a feature to "Create Form from Existing" Blobs not copied - SAGGS                                                                               | <a href="#">DSRMWS-1068</a> |
| Change Management: Create DEC hook fail to find existing OC/Property if the OC/Property is created in OneData and concept name concatenation is longer than 30 characters | <a href="#">DSRMWS-1322</a> |
| Change Management: Create Module Hook - Hide Mod Definition                                                                                                               | <a href="#">DSRMWS-1332</a> |
| Change Management: Create VD and Create DEC no longer saves user specified long name                                                                                      | <a href="#">DSRMWS-1305</a> |
| Change Management: Create VM hook: Remove VM Item ID Found and VM Version Found fields                                                                                    | <a href="#">DSRMWS-1353</a> |
| Change Management: Data Element Maintenance and AI Tool error if try to associate a retired DEC or VD with a Released CDE                                                 | <a href="#">DSRMWS-1302</a> |
| Change Management: Fail to create Form New Version for Form 3059592v1.0                                                                                                   | <a href="#">DSRMWS-1010</a> |
| Change Management: Form: Fail to create new Form Version or create new Form from Existing when Form has Repetition                                                        | <a href="#">DSRMWS-1317</a> |
| Change Management: Forms: Restrict adding Retired CDEs as Questions                                                                                                       | <a href="#">DSRMWS-1241</a> |
| Change Management: HIDE: Set as Latest Version creates wrong data if user selects multiple versions of the same form                                                      | <a href="#">DSRMWS-1321</a> |
| Change Management: Problems found in Sprint 1.21 Testing                                                                                                                  | <a href="#">DSRMWS-1350</a> |
| Data Migration: Migration of Module Display Order handling of Duplicate DO                                                                                                | <a href="#">DSRMWS-1275</a> |
| Data Migration: Update MWS Data Dictionary and caDSR 2 MDR Mapping                                                                                                        | <a href="#">DSRMWS-28</a>   |
| Data Verification: Review summary of differences from Compare                                                                                                             | <a href="#">DSRMWS-1208</a> |
| Documentation: Please create a caDSR II Release Notes page in Wiki                                                                                                        | <a href="#">DSRMWS-1349</a> |
| Download Collection: String Buffer too small Error when pasting in a list of Form Public IDs                                                                              | <a href="#">DSRMWS-1312</a> |
| Download: Create test data for ALS testing                                                                                                                                | <a href="#">DSRMWS-862</a>  |
| Download: Make Download Collection email format consistent                                                                                                                | <a href="#">DSRMWS-1264</a> |

|                                                                                                              |                             |
|--------------------------------------------------------------------------------------------------------------|-----------------------------|
| Downloads: Customer Form Download in Excel                                                                   | <a href="#">DSRMWS-713</a>  |
| Search: Make the "additional search criteria" an exact match search                                          | <a href="#">DSRMWS-1329</a> |
| Security Framework: ADMIN account shows two "Delete Item" commands for Download Collection                   | <a href="#">DSRMWS-1323</a> |
| UI Change: Data Element Maint and AI Tool: Add Context to Forms associated with CDE                          | <a href="#">DSRMWS-1338</a> |
| UI Change: Remove ADMIN ITEM TYP ID Caption for User Cart                                                    | <a href="#">DSRMWS-1328</a> |
| UI Changes: Add drop down for new type: Form Download in MDF format                                          | <a href="#">DSRMWS-1276</a> |
| UI Changes: Administered Items Tool: should hide Internal ID field when creating Alt Definition and Alt Name | <a href="#">DSRMWS-1364</a> |
| UI Changes: Make change to Edit PV/VM Association Caption in AI Tool and VD Maintenance                      | <a href="#">DSRMWS-1368</a> |
| UI Changes: Make Node and Grid for Owned By or Used By Context consistent in DE Maint and AI Tool            | <a href="#">DSRMWS-1357</a> |

## Important Remaining Issues

The following are tracker numbers and descriptions of unresolved issues.

| Feature           | Symptom                                            | Workaround | Jira Tracker Number         |
|-------------------|----------------------------------------------------|------------|-----------------------------|
| Change Management | Forms: Hide Create Stand-Alone Module Hook command | (TBD)      | <a href="#">DSRMWS-1336</a> |
