

caDSR II APIs

You can find Swagger files for available caDSR II REST APIs in the following [API Portal](#):

<https://cadsrapi.cancer.gov/NCIAPIPortal/listAPIs>

You can browse caDSR II API domain classes in the following [API Browser](#). A folder icon next to a class name indicates that you can click on that node to perform a search:

<https://cadsrapi.cancer.gov/caDSR/domain/browser.dsp>

We have designed the primary caDSR II APIs for ease of migration for existing customers. The following example retrieves the latest version of the CDE with public ID 62:

- [https://cadsrapi.cancer.gov/invoke/caDSR/GetXML?query=DataElement\[@publicId=62,@latestVersionIndicator=Yes\]](https://cadsrapi.cancer.gov/invoke/caDSR/GetXML?query=DataElement[@publicId=62,@latestVersionIndicator=Yes])

Keep in mind the following points:

- Both the publicId and latestVersionIndicator attribute criteria on DataElement are in brackets separated by a comma ",".
- caDSR II offers XML, HTML, and JSON formats. To switch object format, change the "Get" parameter: GetXML, GetHTML, or GetJSON.

This page family includes the following pages:

Getting Support

- Email: NCIAppSupport@nih.gov
- Call: 240-276-5541

You can print and export wiki pages

You can send this page to a printer or convert it to a PDF, HTML, or Word document. Refer to [Printing and Exporting Wiki Pages](#).
