

Searching for Administered Items

When you search for administered items in OneData, keep in mind the following points:

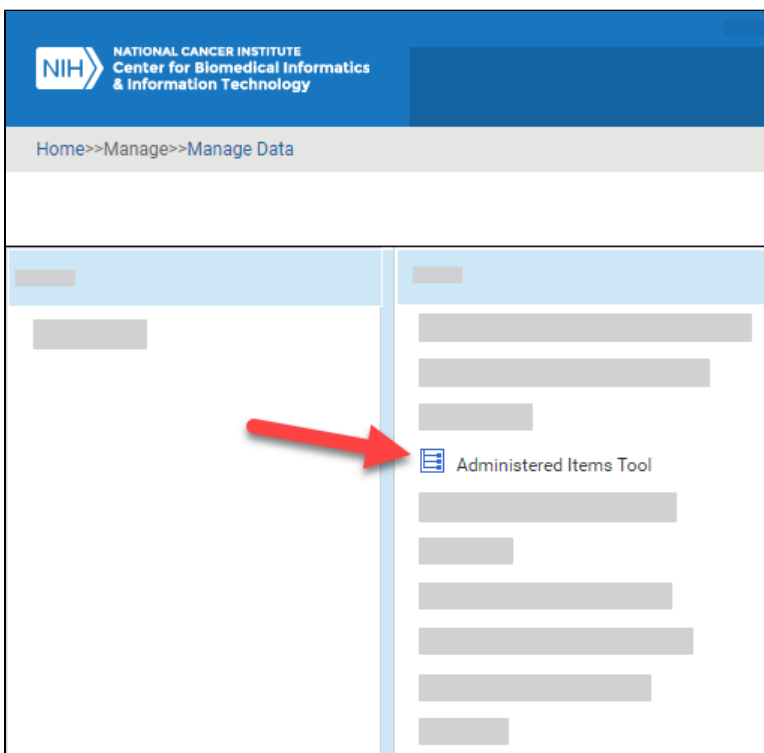

- CDEs follow the ISO/IEC 11179 standard, so you can search for data elements using ISO/IEC 11179-based attributes.
- For each field, the default is all values. For example, in the Latest Version field, the default behavior returns all versions.
- Searches are not case sensitive. Searches for *Gene* and *gene* return the same results.
- In any editable text field, enter a search string, complete or partial. This does not apply to numeric fields such as Public ID.
- In any editable text field, you can use a percent sign (%) as a wildcard. For examples, refer to [Using Wildcards](#).
- For some fields, you can adjust the search scope (with options such as IS NULL, IS NOT NULL, NOT LIKE, Exact Phrase Match, All Of The Words, or One Of The Words) by clicking the Advanced Filter icon.
- The system processes search criteria as AND statements, so the results include only items that fulfill *all* the criteria.
- To reset a list of values, click the Clear Values icon next to that list.
- If you clear a field, or if you leave a field at its default setting, the system does not limit the search by that criterion.
- You can specify the number of results returned: Type a number in the **Number of Rows** field and press <Enter>.
- When you remove or change search criteria, the system does not update search results until you click **Apply Filter** again.

To perform a search:

1. Log in as described in [Logging In](#). The home page appears, with objects you have specified as favorites in the Favorites panel (if any).

2. From the **Manage** menu, select **Manage Data**. The Manage Data page appears.

3. Select **Administered Items Tool**. The Administered Items Tool appears. (For instructions on adding this page to your favorites, refer to [Managing Your Favorites](#).)

4. Specify one or more search criteria, as described in the following table:

Field	Instructions
Item Type	Select the type of registered administered item.
Latest Version	Select one of the following options: <ul style="list-style-type: none"> To search for the latest version of an item, select Yes. To search for all versions except the latest version, select No. As in all fields, the default behavior returns all versions.
Long Name	Type all or part of the long name for an item.
Public ID	Specify the full numeric value for a single public ID. (You cannot use wildcards in numeric fields.)
Short Name	Type all or part of the short name for an item.
Owned By	Select one or more contexts. Owning contexts have the privilege to edit and update an item.
Registration Status	Select one or more registration statuses. For details, refer to Registration Status .
Workflow Status	Select one or more workflow statuses. For details, refer to Workflow Status .
Origin	Select one or more sources (document, project, discipline, or model).
Origin Description	Type all or part of the origin description an item.
Created By	Select the person who created an item. You can select one or more people.
Last Modified By	Select the person who last modified an item. You can select one or more people.

5. In the fields that have a Select a Value icon, you can select one or more values. Click the Select a Value icon next to the field. A Reference Data Panel appears.

- To select one value: Click the value name. The value name appears in the field.
- To select one or more values: Click the checkbox for each row you want to include. Click **Set Values**. The field indicates how many values you have set.

6. For date criteria, click the Audit Columns icon and specify dates as described in the following table:

Field	Instructions
Date Created	Click the calendar icon and select the date on which the item was created.
Date Last Modified	Click the calendar icon and select the date on which the item was last modified.

To adjust search scope, click the Advanced Filter icon and consider the following options:

- The list to the left of each date field allows you to search for items later than (>), earlier than (<), and/or equal to the date you specify.
 - The list to the right of each date field allows you to specify whether the date field is NULL or NOT NULL.
 - The check box below each date field allows you to specify a date range.
7. You can also create your own query to search, by specifying an explicit "where" clause. Click the Advanced Filter icon. Under **Filter Options**, select a column and then click >>. The name of the selected column appears in the text box. Complete the query string. (For example, if your query string is "a.CURRNT_VER_IND=1" when you click Apply Filter, the system returns all items of the latest version.)
8. If necessary, you can specify additional criteria for finding items using one of the "Child Filter" options in the lower part of the search page. The system filters for items that match details specified in the selected child filter. For details, click one of the following links:

Field	Instructions
-------	--------------

Multiple Public ID Search	<p>Enter a public ID, complete or partial.</p> <p>To specify multiple public IDs, click the Advanced Filter icon. In the adjacent field, select One of the Words. Enclose each ID in periods and separate each value with a space (for example: .5. .6. .10.).</p>	
Enter Search String	<p>Type all or part of a search string. This field searches long name, short name, and definition. (To adjust search scope, click the Advanced Filter icon.)</p>	
Field	Instructions	
Alternate Definition	Type all or part of an alternate definition. (To adjust search scope, click the Advanced Filter icon.)	
Definition Type	Select a definition type.	
Context	Select one or more contexts.	
Language	Select a language.	
Field	Instructions	
Alternate Name	An item may have multiple alternate names in multiple contexts. Type all or part of an alternate name. (To adjust search scope, click the Advanced Filter icon.)	
Alternate Name Type	Select an alternate name type.	
Context	Select one or more contexts.	
Field	Instructions	
Primary	Specify whether the associated concept is primary (Yes) or not (No).	
Concept	Select one or more concepts.	
Concept Name	Type all or part of a concept name.	
Concept Code	Type all or part of a concept code.	
Integer Value	Specify all or part of the integer value. You can specify part of the value because this field is actually a text field. For example, if you specify "20" in this field and if items exist with "120" or ">=200", the system returns those items. (To adjust search scope, click the Advanced Filter icon.)	
Field	Instructions	
CS CSI	Select one or more classification schemes or classification scheme items.	
CS Long Name	Type all or part of the long name for a classification scheme.	
Field	Instructions	
Context	Select one or more contexts.	
Field	Instructions	
Document Name	Type all or part of a reference document name. (To adjust search scope, click the Advanced Filter icon.)	
Document Type	Select a document type.	
Document Text	Type all or part of a search string. This field searches reference document text. (To adjust search scope, click the Advanced Filter icon.)	
Context	Select one or more contexts.	
Field	Instructions	
Data Element Concept	Select one or more data element concepts.	
DEC Public ID	Specify the full numeric value for a single data element concept public ID. (You cannot use wildcards in numeric fields.)	

DEC Long Name	Type all or part of the long name for a data element concept.	
DEC Short Name	Type all or part of the short name for a data element concept.	
Value Domain	Select one or more value domains.	
VD Public ID	Specify the full numeric value for a single value domain public ID. (You cannot use wildcards in numeric fields.)	
VD Long Name	Type all or part of the long name for a value domain.	
VD Short Name	Type all or part of the short name for a value domain.	
Preferred Question Text	Type all or part of the preferred question text. (To adjust search scope, click the Advanced Filter icon.)	
Derived Data Element	Specify whether the system derives the data element (Yes) or not (No).	

Field	Instructions
Classification Scheme	Select one or more classification schemes.
CSI	Select one or more classification scheme items.

Field	Instructions
Concept	Select one or more concepts.
Source Type	Select a concept source type.
Rep Term Primary Concept	Specify whether the representation term is a primary concept (Yes) or not (No).

Field	Instructions
Conceptual Domain	Select one or more conceptual domains.

Field	Instructions
Object Class	Select one or more object classes.
Property	Select one or more properties.
Conceptual Domain	Select one or more conceptual domains.
CD Long Name	Type all or part of the long name for a conceptual domain.

Field	Instructions
Module	Select one or more module names.
Module Name	Type all or part of a module name. (To adjust search scope, click the Advanced Filter icon.)

Field	Instructions
Protocol	Select one or more protocols. This option is applicable only when searching for case report forms.
Protocol Definition	Type all or part of a protocol definition.
Protocol Type	Select a protocol type.
Protocol ID	Type all or part of a protocol ID. You can specify part of the value because this field is actually a text field. (To adjust search scope, click the Advanced Filter icon.)
Protocol Phase	Type all or part of a protocol phase. (To adjust search scope, click the Advanced Filter icon.)
Lead Organization	Select one or more organizations.

Field	Instructions
Value Domain Type	Specify whether the value domain type is enumerated or not.
caDSR Data Type	Select a caDSR data type.
Standard Data Type	Select a standard data type.

VD Minimum Length	Specify the full numeric value for the minimum length of a value domain. (You cannot use wildcards in numeric fields.)
VD Maximum Length	Specify the full numeric value for the maximum length of a value domain. (You cannot use wildcards in numeric fields.)
Unit of Measure	Select a unit of measure.
Format	Select a format.
Representation Term	Select one or more representation terms.
Representation Term Long Name	Type all or part of the long name for a representation term.
Conceptual Domain	Select one or more conceptual domains.

Field	Instructions
Value Meaning	Select one or more value meanings.
VM Description Text	Type all or part of value meaning description text. (To adjust search scope, click the Advanced Filter icon.)

9. Click **Apply Filter**. The system lists all items that match your criteria. You can sort columns by clicking the column headers and selecting one of the choices: Ascending, Descending, Clear Sort, or New Sort.
