2022-03-16 Meeting notes

Date

16 Mar 2022

Attendees

- Safran, Tracy (NIH/NCI) [C]

Goals

Discussion items

Time	Item	Who	Notes
	log4j		- Browsers? - Up on Prod and ready to go to DataQA. Jason will send notice - LexEVS - On Stage. Need a Tomcat configuration change on Prod. Need to check with LR next meeting. Will then go to DataQA after. - software ready, waiting on Tomcat configuration to hide stack trace. - CTS2/URI Resolver - On Stage. Log4j fix should be ready for promotion - There is a URI Resolver bug being worked on for later
	VM Migration		- Dev complete - QA still pending - Meeting on Tuesday but no systems update
	Metathesaurus		- Loaded on DataQA and under review - Possibly need to spin off post-processing into its own script
	EVS Compare		- Clearing mechanical hurdles slowly - Meeting with engineering next week
	Metrics and Sumo		- What is needed for reporting to Lyubov? Notes on meeting below - What reports is she getting now, in what form? - Options for incorporating older data - EVS RestAPI now has Apache but waiting on Systems for collector - Only on Dev but for all applications - Need to run a stress test on the API - Need to talk to Manish about API for Sumo - Also possibly look at pulling from Google Analytics - Sitestats had some automated bot filtering but Sumo does not.

Notes

Attendees: Mark Benson, Lyubov, Cory, Tracy, Scott

- Reports should do the following:
- Run reports at any time (ad hoc)
- Monthly reports
- Ability to compare January to February statistics (or any given months)
- Ability to do comparisons as needed

Metrics roughly the ones shown during our demo including:

- Define a time period to compare

- Number of visits
- Number of visitors from different URL
- All parameters by the tool should be available monthly
- Example: From June – July, what are the number of visits

Proposed:

Mayo team to create reports and show them in a couple of weeks.

The reports will be created in spreadsheets

Our team will work from feedback.

To be defined:

List of people receiving reports

Location of reports

User should be able to dynamically create reports. (If this is a requirement, and needs to be done outside of Sumo Logic, we may need to discuss a development cycle for a new application including asking for extended Sumo support for working through their API)
