Statistics Dashboard	<p>Discussion Points: Metrics report due this week.</p> <p>Decision Points:</p>
Comparison/Mapping Tool	<p>Discussion Points</p> <p>Decision Points:</p> <p>Draft requirements attached here</p> <p><b>Mapping</b></p> <p>Match = an automated or manual finding of a link between terms in two sources. This match can be formal, logical or a combination.</p> <p>Map = a sorted, accepted alignment between two sources – maps are made up of term or concept matches.</p> <p><b>General</b></p> <p>Ability to import formal terms or concepts for matching. Ability to export the mappings that you generate.</p> <p>Ability to map strings from an input file.</p> <p>Ability to normalize and tolerate strings such that a possible match is more easily identified (not restricted to EXACT match, word order is not important, etc)</p> <p>Map from input file to NCI Full_Syn at the very least. Most of our use cases are mappings to NCI.</p> <p>It would be nice to be able to map to other terminologies, such as those in the NCIMeta.</p> <p>Map to NCI concept properties (such as CAS numbers, URI code) and specify output tool to include each property.</p> <p>Ability to exclude mappings to retired concepts – especially if mapping to NCI.</p> <p>Output file matches the same number of records and in the same order, even if term is duplicated or a null value is returned, so aid in validation of matches.</p> <p>Ability to persist and “save” mappings. To create a portion of matching results, then come back later to continue. This could be for storage of maps in progress or ability to upload a map in progress to continue work. Ability to work over multiple sessions. Ability to export a map in progress.</p> <p>Ability to collaborate on maps. Ability to view other people's maps and make suggestions or comments. Ability to expand or edit other people's maps in my own space – i.e. stay their map and add terms or change matches that I think are not correct.</p> <p>Ability to re-publish partial maps – keeping them hidden until they are fully created. Possibly have the “published” part of the maps be totally separate from collaboration tool?</p>
