## Known Issues Found in Sprint 1.36.3.0 Testing

The team created or reopened the following issues during Sprint 1.36.3.0 testing.

| Feature           | Symptom                                                                                                                                                                                                                                                       | Jira Tracker Number         |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| Bulk Loader Tasks | CDE Import Fixes Catch Duplicates in File before Validate from Sprint 36.                                                                                                                                                                                     | <a href="#">DSRMWS-2151</a> |
| Bulk Loader Tasks | DEC Import Fixes from Sprint 36. Invalid Concept Codes or Retired Concept cannot be imported and will report "ERROR" on Import. These must be fixed before "Validate" because missing concepts can create an incorrect OC or Prop and thus and incorrect DEC. | <a href="#">DSRMWS-2154</a> |
| Bulk Loader Tasks | VD and DEC Import CD Popup need to be constrained.                                                                                                                                                                                                            | <a href="#">DSRMWS-2114</a> |
| Bulk Loader Tasks | VM Match for the following special characters:<br><div>(   ) ; - _</div>                                                                                                                                                                                      | <a href="#">DSRMWS-2148</a> |
| Bulk Loader Tasks | PV VM Import: Improve messages and formatting when reusing existing VM.                                                                                                                                                                                       | <a href="#">DSRMWS-2170</a> |
| Download          | Download Detail shows incorrect row count after adding/deleting items to the Collection: SAGGS.                                                                                                                                                               | <a href="#">DSRMWS-1291</a> |
