Issues Not Fixed in This Sprint - Planned for Next Sprint

The following are tracker numbers and descriptions of unresolved issues.

Feature	Symptom	Workaround	Jira Tracker Number
Bulk Loader Tasks	Designation: Import all fields without validation. Validate when Designation is created.	None.	DSRMWS-2193
Bulk Loader Tasks	Form Import: Can't Purge Form with Purge Records.	Use Purge Hierarchies.	DSRMWS-2332
Bulk Loader Tasks	Designations: Ensure "Used By" Alternate Name is equal to Context Name.	The formula in the Designation template Alternate Name column sets the Alternate Name to be the same value as the Context column when the Alternate Name Type = Used By, but this prevents Alternate Name from being entered by the user for other types of Alternate Names. The worksheet can be saved as a CSV filetype to avoid this constraint.	DSRMWS-2399
Change Management	Classifications displayed results are not consistent.	In Data Element Maintenance > 3. Classifications node, only Classifications/CSI with WFS Release are displayed. In "Classify/UnClassify" all Classifications are displayed regardless of WFS.	DSRMWS-2366
