BACKGROUND

The NCI Program for Natural Product Discovery

- The [NPNDP prefractionated library](#) is publicly accessible, free of charge, and open to screening against any disease target.
- NPNDP prefractionated extracts have been screened in an increasing number of assays. Data for some of those screens are available below.

Available screening data

- National Institute for Allergy and Infectious Diseases (NIAID)-supported [screen of crude and prefractionated extract activity](#) in growth assays for *E. coli*, *E. coli tolC* efflux pump deficient mutant, *S. aureus*, and *C. albicans*. (2023)
