2023-10-11 Meeting notes

Date

10 May 2023

Attendees

- Safran, Tracy (NIH/NCI) [C]

Goals

Discussion items

Time	Item	Who	Notes
	Notes pasted from while wiki was down		NCIt Browser – pull request – into Dev. Per Jason we should be able to merge into master. CSS Universal Banner – still in planning. Ye Wu is researching adding a line in the CSS to check if a file exists. If it does, it will serve it up as a banner on any/all public facing web pages. This is something we want to do before the next threatened government shutdown. Action item: Get a reviewable proposal by next Wednesday (Mark) Java/Spring update – Java 17/Spring 6 may be required this year. Will pull along hibernate, maybe lucene, others. Gauging scope and feasibility. Mayo to examine and construct plan for migration and estimate level of effort. Action: diagram by end of October? LOE in November? Data – Mapping update – Snomed and ICD10s in EVSExplore now. Snomed to ICD10 mappings required. JQuery – They can remove anything except inside the cts2service war. All the instances in the scan are .js files, not actually jQuery jars. There is nothing to move. Is there a vulnerability there?
