Transferring Data to SRA

1. Transfer your dataset from DME to the `dme-sra-submit-aws` S3 bucket, as described in [Downloading to an AWS S3 Bucket via the GUI](). (For credentials to this bucket, contact ncidatavault@mail.nih.gov.) AWS keeps this data in this bucket for two weeks.
2. In SRA (https://submit.ncbi.nlm.nih.gov/subs/sra) after login, click **New submission**. The bucket policy is already set for NCBI to access the dataset.
3. In the SRA **Files** tab, specify `dme-sra-submit-aws` (the name of the S3 bucket) as the source of your files.
