4. In the Site Name field, type part or all of the site being studied. The Site Code System, ICD-O-3 (International Classification of Diseases for Oncology, 3rd Edition) is preselected for you.

Search tips

Type as many letters of the site name as possible to reduce the number of search results. The system adds wildcards on both sides of the search string (the series of letters you type) for you implicitly. You can type wildcard symbols (%) between characters of the string as necessary.

5. Press Enter, or click Search.

The system searches for the site in the database and returns a list of results.
