

Copy of Accrual Data Field Formats for Complete Trials - Include v4.4 - ALT 2/15/2024 v2.0

The following table lists the data fields by the table in which they are recorded. It also provides the field number (field position in a row); and the format and character limits for each field.

| Tables | Field (Field Position in a Row) | Format (Maximum Number of Characters) |
|---------------|--|---------------------------------------|
| COLLECTIONS | Study Identifier (2) | Text (35) |
| COLLECTIONS | Change Code (11) | Number (1) |
| PATIENTS | Study Identifier (2) | Text (35) |
| PATIENTS | Study Subject Identifier (3) | Text (20) |
| PATIENTS | ZIP Code (4) | Text (10) |
| PATIENTS | Country of Residence (5) | Text (2) |
| PATIENTS | Patient's Date of Birth (6) | Date (YYYYMM) |
| PATIENTS | Gender of a Person (7) | Text (10) |
| PATIENTS | Ethnicity (8) | Text (25) |
| PATIENTS | Payment Method (9) | Text (50) |
| PATIENTS | Subject Registration Date (10) | Date (YYYYMMDD) |
| PATIENTS | Registering Group Identifier (11) | Text (25) |
| PATIENTS | Study Site Identifier (12) | Text (25) |
| PATIENTS | Subject Disease Code (22) ¹ | Number (10) |
| PATIENT_RACES | Study Identifier (2) | Text (35) |
| PATIENT_RACES | Study Subject Identifier (3) | Text (20) |
| PATIENT_RACES | Race (4) | Text (45) |

 The relation between COLLECTIONS, PATIENTS, and PATIENT_RACES is that COLLECTIONS can have multiple PATIENTS, and PATIENTS can have multiple PATIENT_RACES. These relations are maintained through the use of consistent Study Identifier and Study Subject Identifier fields.

Using the format table, you can determine that you must enter the **Patient's Date of Birth** in the **sixth position** in a row in the **PATIENTS** table as **YYYYMM**. The following diagram contains a typical line of text from a batch file. Brackets with numbers indicate the field position number.

 In the example above,

- The fifth field position (5) is null (blank) because it (Country of Residence) is a conditionally required field and in this example is not required.
- The ninth field position (9) is null (blank) because it (Payment Method) is no longer a field that can be inputted.
- The eleventh field position (11) is null (blank) because it (Registering Group Identifier) is no longer a field that can be inputted.

For trials using ICD-O-3 terminology, use this position for Site and/or Histology Codes. When using both Site and Histology codes, separate them by a semicolon (;).

1. For trials using ICD-O-3 terminology, use this position for Site and/or Histology Codes. When using both Site and Histology codes, separate them by a semicolon (;).
