Search All... Filter Options

The Trial Search page in CTRP Accrual automatically displays a List of Trials to which a user has been granted access to submit accrual against upon login.

Show/Hide allows users to define data elements to display for their List of Trials.

Users can search the auto populated List of Trials by entering keyword criteria and/or applying filters.

NCI Trial ID	Current Trial Status	Trial Type	Accrual Type	Action
NCI-2023-	Complete	Non-interventional	Partial Subject	
NCI-2022-	Active	Interventional	Summary	
NCI-2021-	Active	Interventional	Subject	
NCI-2021-	Active	Interventional	Summary	
NCI-2020-	Active	Interventional	Subject	
NCI-2020-	Active	Non-interventional	Summary	
NCI-2020-	In Review	Non-interventional	Summary	
NCI-2017-	Withdrawn	Non-interventional	Partial Subject	
NCI-2017-	Active	Interventional	Subject	
NCI-2017-	In Review	Interventional	Subject

- Your CTRP user account must have authorization to report accrual data to your studies.
- Studies appear in the list after they have been registered and accepted in CTRP.
- For Complete/Protocol studies:
 - The overall trial status history should include one of the open statuses.
 - Studies with a status of In Review or Approved are not available in the accrual application. Once they have reached an open/recruiting status, they will be available for accrual reporting.
- The Participating Site (PS) on the study record must include one of the open/recruiting statuses before accrual can be reported.

For information on study statuses, refer to [Trial Status Values in the CTRP and ClinicalTrials.gov](#).

You can search for a study by one or more criteria, or you can list all studies to which you have been granted access by leaving all of the search criteria fields blank. If you search by the Official Title, use keywords and wildcards (%) rather than phrases for the entire title. Doing so minimizes the potential for excluding any titles with misspellings or slightly different phrasing from the search results. For example, a Phase II study may have been reported as a Phase 2 study.
