

Init1pm16 - 21090 Datatype Support

Pre Interview:

Item	Information/Response
Date :	12/18/2009
Requirement # unique id <SemCon Ops Initiative>.<analysts initials><requirement number> e.g. Init1dbw1 (eventually linked to Use Cases)	Init1pm16
Originator/Customer's Name:	Christo Andonyadis
Originator/Customer's Company:	NCI
Summary of requirement pre-interview, by Reviewer:	ISO 21090 datatypes are beginning to be used as a standard within the CTMS workspace. There is a distinct need to support reuse of these datatypes within the metadata repository. See the following for more information: • CBIIT 21090 Wiki • Forum posting on 21090 Address Usage • Address Interoperability Working Group • Analysis Performed by caDSR Team • ISO 21090 Standard • Additional NCI ISO 21090 Information • COPPA ISO 21090 PIM This functionality will greatly effect all users of the semantic infrastructure, especially Information Technologists and Metadata Specialists.
Recommended Next Step Enter one: Follow-up interview, Observe, Use Case Template (text), Use Case Model (formalized /UML diagram), Group Discussion, Prototype, Waiting Room	1. Use Case Template 2. Follow-up Interview
