Init1SD5-Transform ability amongst Research and Clinical Datatypes

Pre Interview:

Item	Information/Response
Date:	12/25/2009
Requirement # unique id *<SemCon Ops Initiative>.<analysts initials><requirement number>* e.g. Init1dbw1 (eventually linked to Use Cases)	Init1SD5
Originator/Customer's Name:	Brian Davis
Originator/Customer's Company:	3rd Millenium
Summary of requirement pre-interview, by Reviewer:	ISO 21090 data types provide a harmonized set of data type definitions for representing and exchanging healthcare related information To achieve interoperability at a very granular level amongst applications that use ISO 21090 or XML datatypes, there needs to be translation at the datatype level between the two applications.
Recommended Next Step Enter one: Follow-up interview, Observe, Use Case Template (text), Use Case Model (formalized/UML diagram), Group Discussion, Prototype, Waiting Room	Review and harmonize
